

Authorized IDX Website Providers

The following companies have licensed with ValleyMLS to provide a RETS and/or API Data Feed and are familiar with the Internet Data Exchange (IDX) program and are currently receiving a RETS/API data feed from ValleyMLS. Upon signing the ValleyMLS Participant Data Access Agreement, the below vendors have committed to working within the ValleyMLS IDX guidelines and the MLS Rules and Regulations.

ValleyMLS does not specifically recommend or endorse these companies. You may choose any developer to work on your site, whether or not they are on this list. However, all new IDX developers who need to access the ValleyMLS RETS/API server must execute a data licensing agreement in order to receive data downloads. Go to the Paragon Home page and complete the Participant Data Access Agreement.

For information on becoming an approved IDX web developer, please instruct the developer to send an email to melissa@valleymls.com
